K Raheja Corp Real Estate Private Limited (Formerly known as Feat Properties Private Limited)

Date: 29.11.2024

The Chief Conservator of Forest, Ministry of Environment, Forests & Climate Change Regional Office (WCZ), Ground Floor, East Wing, New Secretariat Building, Civil Lines, Nagpur- 440001.

Subject Submission of six-monthly EC Compliance Report for period April 2024 to September 2024 for proposed Residential development on plot bearing C. S. No. (S) 2/2 of Salt pan division situated in F/N ward, Sion (E), Mumbai.

Reference Environmental Clearance by SEIAA, Maharashtra vide EC Identification No: : EC23B038MH153350 dated 26th September 2023.

Dear Sir,

To,

With reference to above, we wish to inform you that we have proposed Residential development on plot bearing C. S. No. (S) 2/2 of Salt pan division situated in F/N ward, Sion (E), Mumbai. The project has been approved and granted Environmental Clearance by SEIAA, Maharashtra vide EC Identification No: EC23B038MII153350 dated 26th September 2023.

As per the condition stipulated in Environmental Clearance, we are submitting herewith sixmonthly compliance status report for period of April 2024 to September 2024 along with the desired information and copies of documents are as under:

- 1. Data sheet
- 2. EC Compliance report
- 3. Post Monitoring Reports

We hope the above is to your satisfaction.

Thanking You.

Yours faithfully, M/s. K Raheja Corp Real Estate Pvt. Ltd. K Muht.

Authorized Signatory.

Subject:	EC Compliance for April 2024 - September 2024 Of [M/s. K Raheja Corp Real Estate Pvt. Ltd. for proposed Residential development on plot bearing C. S. No. (S) 2/2 of Salt pan division situated in F/N ward, Sion (E), Mumbai, Maharashtra]
Attachments:	Six Monthly EC Compliance Report Apr 24-Sept 24.pdf

Respected Sir/Madam,

As per MoEF&CC notification vide No. SO 5845(E) Dated-26.11.2018 AND as informed by Central Pollution Control Board, Regional Directorate (West), Vadodara regarding digital transaction of EC Compliance report under Government of India initiatives for promoting e-office through digital transaction of activities, we are submitting herewith six-monthly EC compliance status report for period April 2024 -September 2024 for proposed Residential development on plot bearing C. S. No. (S) 2/2 of Salt pan division situated in F/N ward, Sion (E), Mumbai, Maharashtra by M/s. K Raheja Corp Real Estate Pvt. Ltd. in pdf format with signed and stamped by authorized signatory of the project.

Documents enclosed herewith are as listed below:

1. Cover letter

- 2. Datasheet
- 3. EC compliance status report
- 4. List of annexures
- 5. Documents as per list of annexures

Hope the above is to your satisfaction.

Thanks & Regards, Varsha Yogesh Kalange

The environmental statement for each financial year ending 31 st March in Form -V as is mandated to be submitted by project proponent to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986 as amended subsequently, shall also be put on the website of the company along with the status of compliance of EC conditions and shall also be sent to the respective Regional Offices of MoEF by e-mail.	Noted & agreed.
vi.	No further Expansion or modifications, other than mentioned in the EIA Notification, 2006 and its amendments, shall be carried out without prior approval of the SEIAA. In case of deviations or alterations in the project proposal from those submitted to SEIAA	Noted & agreed.

LIST OF ANNEXURES

ANNEXURE I	Monitoring Reports
ANNEXURE II	Environmental Clearance report
ANNEXURE III	Approved Layout Plan
ANNEXURE IV	Water Connection Charges
ANNEXURE V	Temporary Drainage Connection for labour camp
ANNEXURE VI	SWD Remarks
ANNEXURE VII	CFO NOC
ANNEXURE VIII	SWM / C&D NOC
ANNEXURE IX	Civil Aviation NOC
ANNEXURE X	Layout showing side louvers around STP.
ANNEXURE XI	Letter to garden superintendent
ANNEXURE XII	Geohydrological Report
ANNEXURE XIII	Plan showing Distance between DG set & open to sky area of STP
ANNEXURE XIV	Photographs of Labour facilities
ANNEXURE XV	PUC Copies
ANNEXURE XVI	Advertisement
ANNEXURE XVII	Consent to Establish

Testing Laboratory is certified by ISO 9001:2015&ISO 45001:2018 Recognized by MoEFCC as "Environmental Laboratory" valid up to 24.04.2025 Laboratory: P-1, MIDC Mohopada, Rasayani, Dist. Raigad, 410222, E-mail: pglab@aespl.co.in Tel:9112844844, CIN: U74999MH2001PTC132091 UDYAM-MH-19-0029787

M/s. K Raheja Corp Real Estate Private Limited., C. S. No. (S) 2/2, Salt pan division situated in F/N ward, Sion (E), Mumbai.

Subject : Environment Clearance for proposed Residential development on plot bearing
 C. S. No. (S) 2/2 of Salt pan division situated in F/N ward, Sion (E), Mumbai
 by M/s. K Raheja Corp Real Estate Private Limited.

Reference : Application no. SIA/MH/INFRA2/412288/2022

This has reference to your communication on the above-mentioned subject. The proposal was considered by the SEAC-2 in its 195th meeting under screening category 8 (a) B2 as per EIA Notification, 2006 and recommend to SEIAA. Proposal then considered in 264^{th} (Day-1) meeting of State Level Environment Impact Assessment Authority (SEIAA) held on 08^{th} August, 2023.

40	Details of Court Cases/litigations w.r.t the project and project location, if any.	No court case is pending against the project.

3. Proposal is a new construction project. Proposal has been considered by SEIAA in its 264th (Day-1) meeting held on 08th August, 2023. and decided to accord Environment Clearance to the said project under the provisions of Environment Impact Assessment Notification, 2006 subject to implantation of following terms and conditions-

Specific Conditions:

A. SEAC Conditions-

- 1. PP to submit IOD/IOA/Concession Document/Plan Approval or any other form of documents as applicable clarifying its conformity with local planning rules and provisions thereunder as per the circular dated 30.01.2014 issued by the Environment Department, Govt. of Maharashtra.
- 2. PP to submit following updated NOCs & remarks:
 a) Water Supply; b) Sewer Connection; c) Storm Water Drain Remarks; d) CFO NOC;
 e) Tree NOC; f) SWM/C&D NOC; g) Civil Aviation NOC.
- 3. PP to provide 1.5 Mtr. parapet wall around the open to sky portion of STP.
- 4. PP to reduce discharge of treated water up to 35%. PP to submit undertaking from concerned authority/agency/third party regarding use of excess treated water.
- 5. PP to submit geohydrological survey report.
- 6. PP to maintain adequate distance between DG set & open to sky area of STP.
- 7. PP to convert 5% RG area in to Miyawaki planation & include the cost of same in EMP.

B. SEIAA Conditions-

- 1. PP has provided mandatory RG area of 1166.72 m2 on mother earth. Local planning authority to ensure the compliance of the same.
- 2. This EC is restricted up to 52.49 m height only as per Civil Aviation NOC.
- 3. PP to keep open space unpaved so as to ensure permeability of water. However, whenever paving is deemed necessary, PP to provide grass pavers of suitable types & strength to increase the water permeable area as well as to allow effective fire tender movement.
- 4. PP to achieve at least 5% of total energy requirement from solar/other renewable sources.
- 5. PP Shall comply with Standard EC conditions mentioned in the Office Memorandum

issued by MoEF& CC vide F.No.22-34/2018-IA III dt.04.01.2019.

 SEIAA after deliberation decided to grant EC for-FSI- 21,219.99 m2, Non FSI-27,270.45 m2, total BUA- 48,490.44 m2. (Plan approval No-13610/2022/(2/2)/F/North/SALTPAN/337/1/New, dated 20.06.2023) (Restricted as per appraisal)

General Conditions:

a) <u>Construction Phase :-</u>

- I. The solid waste generated should be properly collected and segregated. Dry/inert solid waste should be disposed of to the approved sites for land filling after recovering recyclable material.
- II. Disposal of muck, Construction spoils, including bituminous material during construction phase should not create any adverse effect on the neighbouring communities and be disposed taking the necessary precautions for general safety and health aspects of people, only in the approved sites with the approval of competent authority.
- III. Any hazardous waste generated during construction phase should be disposed of as per applicable rules and norms with necessary approvals of the Maharashtra Pollution Control Board.
- IV. Adequate drinking water and sanitary facilities should be provided for construction workers at the site. Provision should be made for mobile toilets. The safe disposal of wastewater and solid wastes generated during the construction phase should be ensured.
- V. Arrangement shall be made that waste water and storm water do not get mixed.
- VI. Water demand during construction should be reduced by use of pre-mixed concrete, curing agents and other best practices.
- VII. The ground water level and its quality should be monitored regularly in consultation with Ground Water Authority.
- VIII. Permission to draw ground water for construction of basement if any shall be obtained from the competent Authority prior to construction/operation of the project.
- IX. Fixtures for showers, toilet flushing and drinking should be of low flow either by use of aerators or pressure reducing devices or sensor based control.
- X. The Energy Conservation Building code shall be strictly adhered to.
- XI. All the topsoil excavated during construction activities should be stored for use in horticulture / landscape development within the project site.
- XII. Additional soil for levelling of the proposed site shall be generated within the sites (to the extent possible) so that natural drainage system of the area is protected and improved.
- XIII. Soil and ground water samples will be tested to ascertain that there is no threat to ground water quality by leaching of heavy metals and other toxic contaminants.
- XIV. PP to strictly adhere to all the conditions mentioned in Maharashtra (Urban Areas) Protection and Preservation of Trees Act, 1975 as amended during the validity of Environment Clearance.
- XV. The diesel generator sets to be used during construction phase should be low sulphur diesel type and should conform to Environments (Protection) Rules prescribed for air and noise emission standards.
- XVI. Vehicles hired for transportation of Raw material shall strictly comply the emission

norms prescribed by Ministry of Road Transport & Highways Department. The vehicle shall be adequately covered to avoid spillage/leakages.

- XVII. Ambient noise levels should conform to residential standards both during day and night. Incremental pollution loads on the ambient air and noise quality should be closely monitored during construction phase. Adequate measures should be made to reduce ambient air and noise level during construction phase, so as to conform to the stipulated standards by CPCB/MPCB.
- XVIII. Diesel power generating sets proposed as source of backup power for elevators and common area illumination during construction phase should be of enclosed type and conform to rules made under the Environment (Protection) Act, 1986. The height of stack of DG sets should be equal to the height needed for the combined capacity of all proposed DG sets. Use low sulphur diesel is preferred. The location of the DG sets may be decided with in consultation with Maharashtra Pollution Control Board.
 - XIX. Regular supervision of the above and other measures for monitoring should be in place all through the construction phase, so as to avoid disturbance to the surroundings by a separate environment cell/designated person.

B) Operation phase:-

- I. a) The solid waste generated should be properly collected and segregated. b) Wet waste should be treated by Organic Waste Converter and treated waste (manure) should be utilized in the existing premises for gardening. And, no wet garbage will be disposed outside the premises. c) Dry/inert solid waste should be disposed of to the approved sites for land filling after recovering recyclable material.
- II. E-waste shall be disposed through Authorized vendor as per E-waste (Management and Handling) Rules, 2016.
- III. a) The installation of the Sewage Treatment Plant (STP) should be certified by an independent expert and a report in this regard should be submitted to the MPCB and Environment department before the project is commissioned for operation. Treated effluent emanating from STP shall be recycled/ reused to the maximum extent possible. Treatment of 100% grey water by decentralized treatment should be done. Necessary measures should be made to mitigate the odour problem from STP. b) PP to give100 % treatment to sewage /Liquid waste and explore the possibility to recycle at least 50 % of water, Local authority should ensure this.
- IV. Project proponent shall ensure completion of STP, MSW disposal facility, green belt development prior to occupation of the buildings. As agreed during the SEIAA meeting, PP to explore possibility of utilizing excess treated water in the adjacent area for gardening before discharging it into sewer line No physical occupation or allotment will be given unless all above said environmental infrastructure is installed and made functional including water requirement.
- V. The Occupancy Certificate shall be issued by the Local Planning Authority to the project only after ensuring sustained availability of drinking water, connectivity of sewer line to the project site and proper disposal of treated water as per environmental norms.
- VI. Traffic congestion near the entry and exit points from the roads adjoining the proposed project site must be avoided. Parking should be fully internalized and no public space should be utilized.
- VII. PP to provide adequate electric charging points for electric vehicles (EVs).

- VIII. Green Belt Development shall be carried out considering CPCB guidelines including selection of plant species and in consultation with the local DFO/ Agriculture Dept.
 - IX. A separate environment management cell with qualified staff shall be set up for implementation of the stipulated environmental safeguards.
 - X. Separate funds shall be allocated for implementation of environmental protection measures/EMP along with item-wise breaks-up. These cost shall be included as part of the project cost. The funds earmarked for the environment protection measures shall not be diverted for other purposes.
 - XI. The project management shall advertise at least in two local newspapers widely circulated in the region around the project, one of which shall be in the Marathi language of the local concerned within seven days of issue of this letter, informing that the project has been accorded environmental clearance and copies of clearance letter are available with the Maharashtra Pollution Control Board and may also be seen at Website at parivesh.nic.in
- XII. A copy of the clearance letter shall be sent by proponent to the concerned Municipal Corporation and the local NGO, if any, from whom suggestions/representations, if any, were received while processing the proposal. The clearance letter shall also be put on the website of the Company by the proponent.
- XIII. The proponent shall upload the status of compliance of the stipulated EC conditions, including results of monitored data on their website and shall update the same periodically. It shall simultaneously be sent to the Regional Office of MoEF, the respective Zonal Office of CPCB and the SPCB. The criteria pollutant levels namely; SPM, RSPM. SO2, NOx (ambient levels as well as stack emissions) or critical sector parameters, indicated for the project shall be monitored and displayed at a convenient location near the main gate of the company in the public domain.

C) General EC Conditions:-

- I. PP has to strictly abide by the conditions stipulated by SEAC& SEIAA.
- II. If applicable Consent for Establishment" shall be obtained from Maharashtra Pollution Control Board under Air and Water Act and a copy shall be submitted to the Environment department before start of any construction work at the site.
- III. Under the provisions of Environment (Protection) Act, 1986, legal action shall be initiated against the project proponent if it was found that construction of the project has been started without obtaining environmental clearance.
- IV. The project proponent shall also submit six monthly reports on the status of compliance of the stipulated EC conditions including results of monitored data (both in hard copies as well as by e-mail) to the respective Regional Office of MoEF, the respective Zonal Office of CPCB and the SPCB.
- V. The environmental statement for each financial year ending 31st March in Form-V as is mandated to be submitted by the project proponent to the concerned State Pollution Control Board as prescribed under the Environment (Protection) Rules, 1986, as amended subsequently, shall also be put on the website of the company along with the status of compliance of EC conditions and shall also be sent to the respective Regional Offices of MoEF by e-mail.
- VI. No further Expansion or modifications, other than mentioned in the EIA Notification, 2006 and its amendments, shall be carried out without prior approval of the SEIAA. In case of deviations or alterations in the project proposal from those submitted to

SEIAA for clearance, a fresh reference shall be made to the SEIAA as applicable to assess the adequacy of conditions imposed and to add additional environmental protection measures required, if any.

VII. This environmental clearance is issued subject to obtaining NOC from Forestry & Wild life angle including clearance from the standing committee of the National Board for Wild life as if applicable & this environment clearance does not necessarily implies that Forestry & Wild life clearance granted to the project which will be considered separately on merit.

4. The environmental clearance is being issued without prejudice to the action initiated under EP Act or any court case pending in the court of law and it does not mean that project proponent has not violated any environmental laws in the past and whatever decision under EP Act or of the Hon'ble court will be binding on the project proponent. Hence this clearance does not give immunity to the project proponent in the case filed against him, if any or action initiated under EP Act.

5. This Environment Clearance is issued purely from an environment point of view without prejudice to any court cases and all other applicable permissions/ NOCs shall be obtained before starting proposed work at site.

6. In case of submission of false document and non-compliance of stipulated conditions, Authority/Environment Department will revoke or suspend the Environment clearance without any intimation and initiate appropriate legal action under Environmental Protection Act, 1986.

7. Validity of Environment Clearance: The environmental clearance accorded shall be valid as per EIA Notification, 2006, amended from time to time.

8. The above stipulations would be enforced among others under the Water (Prevention and Control of Pollution) Act, 1974, the Air (Prevention and Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986 and rules there under, Hazardous Wastes (Management and Handling) Rules, 1989 and its amendments, the public Liability Insurance Act, 1991 and its amendments.

9. Any appeal against this Environment clearance shall lie with the National Green Tribunal (Western Zone Bench, Pune), New Administrative Building, 1st Floor, D-Wing, Opposite Council Hall, Pune, if preferred, within 30 days as prescribed under Section 16 of the National Green Tribunal Act, 2010.

ANNEXURE III

BRIHANMUMBAI MUNICIPAL CORPORATION

Amended Plan Approval Letter

File No. P-13610/2022/(2/2)/F/North/SALT PAN/337/1/Amend dated 06.11.2024

То,	CC (Owner),
KASTURI KEDAR PEWEKAR	K.RAHEJA CORP REAL ESTATE
Plot No. C-30, Block "G", Opp. SIDBI,	PRIVATE LIMITED
Bandra Kurla Complex, Bandra	Plot NoC-30, Block 'G', Next to Bank
(East)	of Baroda, Ba <mark>ndra Kurla Complex,</mark>
	Bandra (E) , Mumbai - 400051

Subject : Proposed Residential building on plot bearing C.S. No. 2/2, Of Salt Pan Division at Sion Mumbai in F/North Ward Somaiya Ground, Chunabhatti, Sion, Mumbai - 400022.

Reference : Online submission of plans dated 30.09.2024

Dear Applicant/ Owner/ Developer,

There is no objection to your carrying out the work as per amended plans submitted by you online under reference for which competent authority has accorded sanction, subject to the following conditions.

- 1) That all the conditions of I.O.D. under even No. dated 17/07/2023 shall be complied with.
- 2) That the revised structural design / calculations / details / drawings shall be submitted before extending C.C.
- 3) That payment towards following shall be made before asking for C.C.a) Development Charges, b)Extra Water / Sewerage charges at A.E.W.W. 'F/N Ward Office, c) Labour welfare Cess.d) Fungible Premium e) Staircase, lift, lift lobby premium for both wing, f) Open space deficiency Additional development cess
- 4) That the final N.O.C. from C.F.O. shall be submitted before asking for Occupation permission.
- 5) That the drainage layout shall be revised and be got approved from this office before carrying out further drainage work.
- 6) Fresh Tax Clearance certificate from AA & C 'F/N' ward shall be submitted before endorsement of CC
- 7) That the work shall be carried out strictly as per approved plan.
- 8) That all condition and direction specified in the order of Hon'ble Supreme Court dated 15.3.2018 in dumping ground case shall be complied with
- 9) That the C.C. shall be got endorsed as per the amended plan.
- 10) That the adequate safeguards shall be employed in consultation with SWM dept of MCGM for preventing dispersal of particles throughair and construction debris generated shall not be deposited in specific site inspect and approved by SWM department of MCGM.
- 11) That the revise parking remarks shall be submitted.
- 12) That the NOC from E.E.(M&E)/Consultant for Basement / AVS shall be submitted

For and on behalf of Local Authority Municipal Corporation of Greater Mumbai Executive Engineer . Building Proposal

(E), Mumbai - 400051 Subject : Storm Water Drains Remark for C.T.S./C.S. No. 2/2 of Village/Div. 2039 at City,F/North, Mumbai. **Reference:** 1) Application No. P-13610/2022/(2/2)/F/North/SALT PAN-SWD/1/New dated 07 Aug 2023 2) I.O.D No.P-13610/2022/(2/2)/F/North/SALT PAN-IOD dated 7/17/2023 12:34:53 PM

Dear Applicant,

With reference to the above referred letter at Sr. No. 1, the Storm Water Drain remarks for the plot under reference is as per, subject to the following conditions :-

- 1. The minimum formation / ground level of plot under reference shall be at least 28.04 M. (92.00') THD or 15 cm. (6") above the formation level of proposed footpath, if any, raised footpath / existing access, abutting / proposed road, whichever is higher.
- 2. The Storm Water Drain suggested shall be laid as per Municipal Specifications using R.C.C. pipes NP2 class below 450 mm. dia. and NP3 class pipe for 450 mm. dia. and above pipes, (I.S.I. Mark only) duly encased with 15 cm. thick M-15 cement concrete all around along with provision of water entrances at 10 m c/c / catch pits having minimum size of 450mm. x 450mm. covered with M.S. / C.I. gratings. The built up drain shall be covered with Precast R.C.C. / C.I. grating for entire length. The velocity of flow shall be maintained at 1.2M. / Sec. (4' / sec.) while the drain is running full.
- 3. The access / internal layout roads / D.P. Roads shall be provided with closed Storm Water Drain with regular water entrances at 15 M., (50') and manholes at 15 M., (50') c/c at developer's cost.
- 4. Required catch pit chambers shall be provided at suitable location/ junctions. which shall be 60 cm (2') below the invert of pipes. The internal S. W. Drain arrangement shall be provided as follows :-

a) 0 mm. dia. R.C.C. pipes (slope 1:150) shall be provided.

b) 0 mm. dia built up drain for RG/PG shall be in cement concrete of Grade M-20 having minimum thickness of walls of 20 cm. which shall be covered with gratings where ever required with minimum depth of 300 mm. at starting point @ slope 1:400.

c) In case of Podium is proposed then the down take pipes of 100 mm. dia. from podium / terrace level up to ground level shall be

provided which shall be connected to the water entrance on ground level within property. The slope to the surface of podium / terrace shall be given in such a way that all the storm water from podium / terrace will flow towards down take pipes without stagnation.

- 5. The side / marginal open spaces shall be leveled, consolidated and paved with cement concrete with proper slope in such a way to discharge the storm water into proposed storm water entrances.
- 6. Before starting of the work, invert levels of manhole on Municipal storm water drain to which internal S. W. Drain is to be connected shall be confirmed on site with respect to invert level of last catch pit chamber.
- 7. You shall carry out the entire S.W.D. work through the Licensed Plumber and under supervision of Licensed Supervisor.
- 8. These remarks are given from the point of view of disposal of storm water only, without prejudice to the boundaries of the plot shown, ownership of plot, status of existing structures on it, if any, and use of the land under reference.
- 9. That during the execution work of the proposed building, if any Storm Water Drain, is found existing within the plot shall be brought to the notice of this office immediately & the drain shall be diverted in coordination with SWD dept..
- 10. These remarks are offered without taking into consideration the system of rain water harvesting. If rain water harvesting system is proposed in future, then overflow connection of 300mm dia RCC pipe from the Rain Water Harvesting well/ tank shall be provided and the same shall be connected to the nearest water entrance within the plot.
- 11. Architect shall upload the plan showing proposed storm water drain arrangement.

12. REGARDING STREET CONNECTION :

a) You shall make min 1 or 2 connections as per site conditions minimum 0 mm duly encased with 15 cm. Thick Min of M-15 grade cement concrete all around from last catch pit chamber to Municipal S.W. Manhole, along with shifting of any utilities if necessary, at Developer's risk and cost and certificate for shifting of water entrance from A.E.(SWM) of concerned Ward shall be submitted to this office. The connection shall be made only after the necessary permission for road opening is obtained from A.E. (Maint) of concerned Ward.

b) The work of providing S.W. Drain from last catch pit chamber to Municipal S.W. Drain shall be carried out under the supervision and as per suggestions of A.E. (SWM.) of concerned Ward.

c) In case, if it is not possible to connect internal S.W. Drain to existing manhole on Municipal Storm Water Drain due to site conditions / difficulties or if the existing manhole is far away from the plot, then the internal S.W. Drain shall be connected to Municipal S.W. Drain by constructing additional manhole on Municipal S.W. Drain at developer's cost.

13. REGARDING SETBACK PORTION AND BASEMENT

a) As regards road and footpath work in setback portion, you are requested to obtain remarks from E.E.(Road)City. / E.E.(T.& C.) City / A.E.(Survey) City.

b) In setback portion, after construction of foot path water entrance should be shifted suitably by extending existing lateral by [!
 Dia] mm. dia. R.C.C. pipe (NP2 class) as per municipal specifications and drawings in consultation with and under supervision of A.E.(SWM) of concerned Ward at developer's risk and cost and certificate for shifting of water entrance from A.E.(SWM)/Ward shall

be submitted to this office. Before executing the work of the proposed shifting of the water entrance, you are requested to obtain remarks from E.E. (Roads) City, so that the position of the proposed water entrance can be fixed. Please note that if shifting of water entrance will not be possible by extending the existing pipes then you will have to provide new water entrances at suitable place at your cost.

c) The necessary arrangement shall be provided in basement / Car Lift Pit parking in accordance with I.S. 12251 - 1987(Re - affirmed) for proper collection and disposal of storm water. The arrangement shall also be made to pump out / drain out the water of the basement / Car Lift Pit parking to the nearest water entrance within the property by providing sump well.

d) An Indemnity Bond duly notarized on stamp paper of Rs. 200/- shall be submitted to the Ex. Eng. (S.W.D.) Planning Cell indemnifying M.C.G.M. against any losses, damages, etc., if occurred, due to flooding in the basement/ Car lift pit under reference and stating that the same will be binding on Owner / Developer and their legal heirs / successors or whosoever deriving title through them.

14. REGARDING COMPLETION CERTIFICATE : -

You shall apply online for completion certificate on completion of internal storm water drain work and after street connection is done along with following details.:-

a) Certificate in appendix II format along with completion plan of SWD as carried out on site as per municipal specifications duly certified by Architect/ LS / Licensed plumber.

b) Remarks and sketch from office of the concerned ward about street connection completion from last catch pit chamber to Municipal S.W. Drain.

c) Remarks and sketch from office of the concerned ward about shifting of water entrances Completion if affected by road setback.

15. The Completion Certificate shall be obtained on completion of the work of internal Storm Water Drain as per Municipal specifications from this office.

Notes:

- 1. The above remarks are system generated based on the input data submitted by Architect / Consultant / L.S. / L.P. and if in future it is found that the data is incorrect / fraudulent then the remarks deemed to be treated as cancelled and necessary action will be initiated
- 2. The above remarks are system generated and does not require any signatures.
- 3. All the carriage entrances / culverts shall be designed and constructed considering "AA" class loading.

BRIHANMUMBAI MUNICIPALCORPORATION MUMBAI FIRE BRIGADE.

Office of the Dy. Chief Fire Officer (R-II), Wadala Fire Station, Shaikh Mistry Dargah road, C.G.S. Colony, Opp. MHADA Colony, Antop Hill, Wadala, Mumbai-400 037. Telephone No. 24132058 Fax No. 24153027

<u>Sub</u>: "Fire Protection & Fire Fighting requirements" stipulated to do the compliance for the proposed plans of High rise Residential building under Reg. 30 of DCPR-2034 on plot bearing C.S. No. 2/2, Of Salt Pan Division at Sion Mumbai in F/North Ward Somaiya Ground, Chunabhatti, Sion, Mumbai – 400022.

<u>**Ref**</u>: 1) Online proposal u/No. P-13610/2022/(2/2)/F/North/SALT PAN/337/1/New, dated 30/01/2023 by Mrs. Kasturi Kedar Pewekar, Architect , Mumbai.

Mrs. Kasturi Kedar Pewekar, Architect,Mumbai.

You have uploaded application dated 30/12/2022, building detail form-I, form-II, proposed plans under Regulation 30 of DCPR-2034 for the proposed high residential building comprising of three wings i.e. Wing-'A', Wing-'B' and Wing-'D'. Wherein Wing-'A' and Wing-'B' will be proposed to be having common three level basement (-12.00 Mtrs. with 06.00 mtrs. wide two way ramp. 1st level basement (-03.00 mtrs.) will be for U.G. water storage tanks, Pump room & surface car parking by way of 06.00 mtrs. wide two way ramp;2nd level basement (-07.50 mtrs.) will be for surface & stacked car parking by way of 06.00 mtrs. wide two way ramp & 3rd level basement (-12.00 mtrs.) will be for surface & stacked car parking by way of 06.00 mtrs. wide two way ramp + Common ground floor for D.G. room, Electric meter rooms, Panel room, Transformer room, Toilets, CFO/BMS room and entrance lobbies etc. + Common 1st & 2nd podium floor for surface car parking by way of 06.00 mtrs. wide two way ramp. Thereafter the building is divided into two wings. Wing 'A' will be proposed to be comprising of 1st floor partly common fitness centers for wing 'A' and wing 'B' and partly for residential user + 2nd to 17th upper residential floors with total height of 69.50 Mtrs. from general ground level upto terrace level and Wing 'B' will be proposed to be comprising of 1st floor partly common fitness centers for wing 'A' and wing 'B' and partly for residential user + 2nd to 17th upper residential floors + terrace floor with swimming pool with total height of 69.50 Mtrs. from general ground level upto terrace level. Adjoining to Wing-A on the west side Wing 'D' is proposed as inclusive housing and will be proposed to be comprising of two level basement (-05.65 Mtrs.) for services + 1st basement (-03.00 Mtrs.) for services + ground floor for pit and stack car parking and entrance lobby + 1st to 12th upper residential floors with total height of 44.70 Mtrs. from general ground level upto terrace level as shown onn the plans.

THREE LEVEL BASEMENT (-12.00 Mtrs.) (Common For Wing 'A' And Wing 'B'):-

The proposed building will be having common three level basement (-12.00 mtrs.) for wing 'A' and wing 'B' proposed for Services, surface car parking, stack car parking and puzzle car parking system by way of 06.00 Mtrs. Wide two way ramp. You have mentioned that entire basement is provided with natural ventilation as per norms, through ventilation cut out/ shaft and side ventilators as shown in the plan.

TWO LEVEL BASEMENT (-05.65 Mtrs.) (For Wing 'D'):-

The proposed building will be having two level basement (-05.65 mtrs.) proposed for Services. You have mentioned that entire basement is provided with natural/mechanical ventilation as per norms, through ventilation cut out/ shaft and side ventilators as shown in the plan.

PODIUM FLOOR (+ 12.20 Mtrs.) (Common For Wing 'A' And Wing 'B'):-

The proposed wing 'A' and wing 'B' is having common 1st to 2nd podium floor marginaly extended beyond building line for surface car parking by way of 06.00 Mtrs. Wide two way ramp.

DETAILS OF FLOOR WISE USER OF THE BUILDING (WING 'A' & Wing-B):-

Page 1 of 15

c) To liaise with the City Fire Brigade on regular & continual basis.

The concerned has paid the scrutiny fee & fire service fee as mentioned below:

- Scrutiny Fee:
 - a) Vide your letter dated 31/12/2022; you have certified the gross built up area as 48,843.00 Sq. Mtrs. and paid the scrutiny fees of Rs. 40, 05,130.00/- vide Receipt No. 0235049, 0235050 & 0235051 SAP.Doc. No. 1004508647, dated 12/01/2023.
- Fire Service Fee:
 - a) You have you have certified the gross built up area as 48,843.00/- Sq. Mtrs. & the height of the high-rise residential building as 70.00 Mtrs and as per schedule II of section 11(1) of Maharashtra fire prevention & life safety Measure act 2006, has paid "Fire Service Fee" of Rs.7,32,645.00/- vide Receipt No. 0236560,0236561 & 0236562 & SAP.Doc. No. 1004514789, dated 19/01/2023.

However, you are requested to verify the gross built-up area and inform this department, if it is more for the purpose of levying additional scrutiny fees/fire service fee if required.

The plans approved along with the requirements stipulated for compliance, are approved as submitted online by Architect as per EODB circular without prejudice to legal matters pending in court of law, if any and from Fire risk/Fire safety point of view only. Approval of these plans does not mean in any way permission to start the proposed work. It is the Architects/Developer's responsibility to take necessary prior approval from all concerned authorities & others as per relevant regulation of MMC act for the proposed construction of the building.

Note :-

- a) Stipulating Fire protection & Fire-fighting requirements to do the compliance is for minimizing the chance of occurrence of Fire through active & passive measures. The consequential life & property loss due to fire, due to any noncompliance at any instance the owner/occupier/user/society as the case may be will be solely responsible.
- b) All the fire-fighting installations shall be carried out as per prevailing standard code of practising by Govt. Approved Licensed agency and certificate of that effect and certified schematic drawing of the same shall be obtained from Govt. Approved Licensed agency before applying for the compliance certificate from this department.
- c) This approval is issued only from Fire Protection & Fire-Fighting requirements point of view and shall not be treated as authorized/legal document. Any authorized or legal matter shall be cleared by owner/ occupier/ developer/ architects etc. It is issued for instant proposal only, considering the online application/information by Architect. It shall not be used as precedent for other proposals.
- d) If any matter in this case, not in consonance with DCPR 2034 then this proposal shall be referred back to this department for issuing fresh remarks.
- e) The width of abutting road & open spaces are mentioned in plans as submitted by the Architect/ License Surveyor attached herewith and these parameters shall be certified by the Architect/ License Surveyor. Same shall be complied before submission for obtaining the compliance to this department.
- f) These Fire protection & Fire Fighting requirements stipulated to do the compliance, for the instant online proposal as per E.O.D.B. circular. It is valid only subject to necessary approvals from all the competent authorities.

Scrutinized & Prepared by D.F.O. D.S. Patil Approved By C.F.O S.Y. Manjrekar

Subject :- Approval to Construction & Demolition Waste Management Plan for the site at CTS/CS Number 2/2 of village SALT PAN at ward F/North.

Reference :- Your application / online submission for C&D Waste Management Plan levelling & filling at designated site dtd. 29 Aug 2024.

With reference to your application/ online submission, the Debris Management Plan submitted by you has been approved as per "Construction and Demolition Waste Rules 2016" and you are allowed to transport Construction & Demolition/ Excavation Material from construction site to the unloading site subject to following terms & conditions.

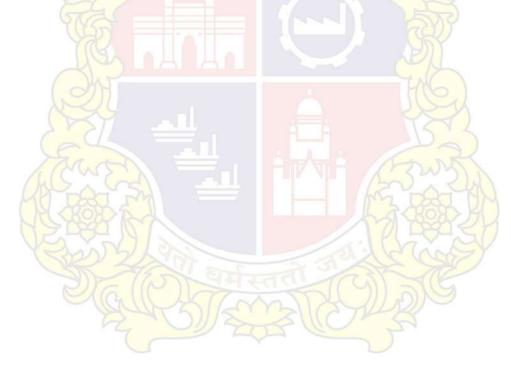

- 1. This approval is subject to the orders given by Hon. Supreme Court u/no. in SLP (Civil) No. D23708/2017 dated 15.3.2018. You shall follow this order of Hon. Supreme Court and instructions therein.
- You shall handle & transport Construction & Demolition Waste / Excavation Material to the extent of 9028 Brassto designated unloading site - Survey No.14/1/B, 14/2, 14/4,14/5, 14/6,15, 16,16/B,17/3,17/4/A, 17/4/B, 17/5,19/A,19/B, 19/C,19/D, 20/1/1, 21/1to 21/9, 21/11/B, 22, 24, 25/1/2, 25/2, 26/1to 26/8, 27/1/A, 27/2, 27/3/A, 27/3/B, 28/1/A, 28/1/C, 28/1/D, 30/1, 30/2, 30/4, 31/A, 39/B, 41/1, Ecohomes - Townships LLP, Village - Ranjnoli, Taluka-Bhivandi, Dist-Thane, .Shabbir Qureshi -9322340359 & validity 15 Feb 2025.
- 3. You shall transport the C&D waste with proper precautions and employ adequate measures safe guards to dispersal of particles through the air.
- 4. You have mentioned designated site for transportation of C&D waste for filling and levelling purpose. The C&D waste shall be transported and deposited at the designated site only The Landfill site (unloading site) shall be governed by the Construction and Demolition Waste Management Rules, 2016 and Solid Waste Management Rules, 2016.
- 5. In the event for any reason whatsoever, the consent given by the Designated Site / Agency is revoked or the time limit for the designated site has expired or the capacity of unloading site is exhausted. In such case the builder / developer shall forthwith stop the transportation activities. The builder / developer shall submit revised Construction and Demolition waste management plan along with required valid documents for revalidation of existing C&D waste Management Plant.
- 6. The construction & Demolition Waste shall be transported through your Transport Contractor. The details of the same shall be uploaded in the system by the applicant at the time of actual transportation.
- 7. The deployed vehicles shall abide by all the R.T.O. rules and regulations. You shall ensure that the vehicles should be properly covered with tarpaulin or any other suitable material firmly to avoid any escape / fall of waste on road from moving vehicle. The body and wheels shall be cleaned and washed thoroughly to avoid spreading of waste on road.
- 8. The copy of approved Construction and Demolition Management Plan Shall be accompanied with each and every vehicle under this approval. The developer shall issue the proper Challan for each and every trip of vehicles and that shall be acknowledged by the agency of unloading site. The developer shall maintain record of C&D material transported and shall make it available to MCGM and / or

Monitoring Committee whenever required for inspection.

- 9. The approval is granted presuming that the papers submitted by the applicants / Owners are genuine. For any dispute arising out of documents submitted by applicant, POA / Occupant / Owner shall be held responsible as prescribed under the law prevailing in force.
- 10. The approval granted hereto does not absolve the other approval required from the other department of M.C.G.M. OR Govt. authorities.
- 11. In case of disputes, court matters etc. related to the subject site / land / property, this approval cannot be treated as a valid proof.
- 12. In case of any breach of condition is brought to the notice of MCGM or Monitoring Committee, Show Cause Notice will be issued and decision will be taken within one month as expeditiously as possible, which shall be binding on you / land owner.
- 13. This approval is not a permission for excavation or permission for dumping but this is the only approval under Construction & Demolition Waste Management Plan for the transportation of Construction & Demolition Waste for unloading at designated unloading site.
- 14. You / Land owner shall submit valid Bank Guarantee from the bankers approved by the MCGM and the amount applicable as per attached table. The bank guarantee remains valid till grant of Occupation Certificate (OCC).
- 15. The license architect / license engineer shall upload compliance report in respect of Construction & Demolition Waste Management Plan, any breach will entitle the cancellation of building permission and work will be liable to stop immediately.
- 16. (A) Project Total Estimated Qty (Brass) :51200(B) Obtained NOC(s) Total Qty (Brass): 23428

Note:

- 1. The above remarks are system generated based on the input data submitted by Architect / Consultant / L.S and if in future it is found that the data is incorrect / fraudulent then the remarks deemed to be treated as cancelled and necessary action will be initiated.
- 2. The above remarks are system generated and does not require any signatures.
- 3. This C & D approval is issued subject to obtaining valid IOD / CC. Actual transportation shall begin after obtaining valid IOD / CC only.

K Raheja Corp Real Estate Private Limited

(Formerly known as Feat Properties Private Limited)

Date: 19.01.2023

To, Office of the superintendent of Gardens, Municipal Corporation of Greater Mumbai (MCGM), Veermata Jijabai Bhosle Udyan, Mumbai 400027.

Sub: Supply of excess treated water to adjoining MCGM's RG reservation at C. S. No. (S) 2/2 (pt) of Salt pan division situated in F/N ward, Sion (E) by M/s. K Raheja Corp Real Estate Private Limited.

Ref No.: EB/3266/GS/A/337/2/Amend.

Dear Sir,

We are proposing development of Residential project on plot bearing C. S. No. (S) 2/2 of Salt pan division situated in F/N ward, Sion (E), Mumbai. We have also submitted our application for the Environmental clearance (EC) to the State Environmental Impact Assessment Authority (SEIAA), Maharashtra proposal no. SIA/MH/INFRA2/ 412288/2022.

We would like to inform you that, we are providing 2 STP's of 150 KLD capacity in our project to treat wastewater (131 KLD). The treated water (standards as per Hon'ble National Green Tribunal (NGT) order dt. 30th April 2019) from the STP will be utilized for flushing (48 KLD) & Gardening (09 KLD) purposes within the layout. As we have the excess treated water (73 KLD) surplus out of which we thought to supply 40 KLD treated water to nearby RG reservation just abutting to our plot.

This will not only save your fresh water requirement for these purpose but also saves precious water resource.

We therefore request you to kindly convey your willingness to accept this treated water. We will make all arrangement for conveyance of this water to nearby RG reservation just abutting to our plot.

Your early reply in this regard is highly appreciated.

Thanking you,

Yours faithfully, For K RAHEJA CORP REAL ESTATE PRIVATE LIMITED.

N R Milt.

1.Geology

1.1 Geography

The area of project is part of Deccan Plateau. The project area is situated at Plot Bearing C. S. No. (S) 2/2 of Salt Pan Division, Situated in F/N ward, Sion (E), Mumbai in the survey of India Toposheet no. **E43A16** (Fig. 1.1) at the altitude of 7 m. (MSL).

Location of the site is at Latitude **19°3'3.44**" **N**, & Longitude: **72°52'11.82**" **E.** The area is easily approachable by tar road. The area lies on the eastern slopes of Sahyadri ranges.

The Satellite image of the said project is shown in **Figure 1.2** respectively.

Sr	Details	Proposed	Units
1.	Total Plot Area	6,150.57	m^2
2.	Deduction	307.53	m^2
3.	Net Plot area	5,843.04	m ²
4.	FSI area	21,219.99	m ²
5.	Non-FSI area	27,289.96	m ²
6.	Total BUA	48,509.95	m ²

Table 1. 1: Area Statement

Figure 1. 1: Toposheet

Figure 1. 2: Satellite Image

1.2 Rainfall

As the area lies in heavy rain fall (West of Sahyadri) area receives good quantity of rain fall, (i.e., around 1,800 to 2,400 mm. approx. in 80 days per year) with nearly 82 % of the rainfall occurring during June – September and 10% occurring during October. The normal annual rain fall of Mumbai varies from about 1800 to 2400 mm. It is minimum at central part of Mumbai around Central Mumbai region. It gradually increases towards North and reaches a maximum around Santacruz (2,382 mm.).

1.3 Geomorphology: Morphological Location

The project site lies in BM watershed and in Micro-shed of safe zone classified in morpho zone. Site comes under Moderate-tomoderate Priority Zone of Sion, Mumbai. Site comes under Arial photograph.

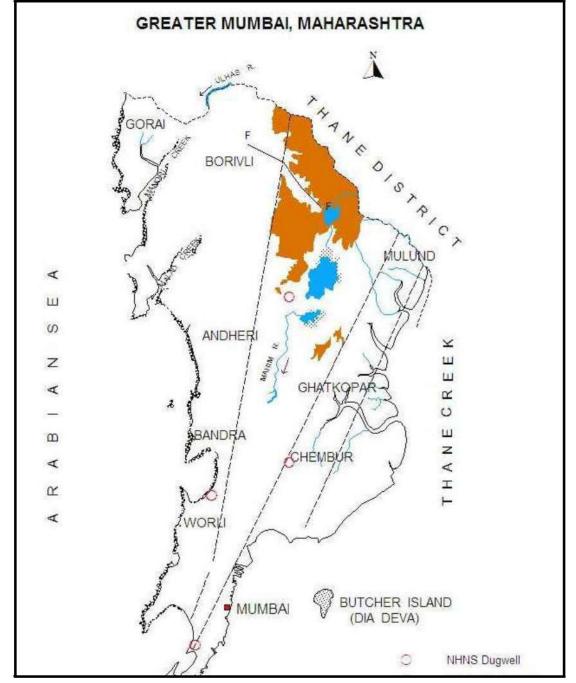

Figure 1. 3: Geomorphology Map

The property gentle slopes in general towards South West (SW). Topography of plot is fairly level in nature. Topography shows that the Northeast part of the land is at higher altitude and South Western part is at lower altitude.

In general, a variation of altitude of about 0.50 to 0.75 meters is observed. From the water shed, it shows typical dendritic drainage pattern.

1.4 Petrology

The area forms the heart of a vast suite of basalts. In general soil cover is good in all parts of land. Below soil well weathered and fractured basalt is present. Basalts are formed from the solidification molten lavas, rich in minerals of Augite and Plagioclase.

1.4.1 Lava Flow Types

Mafic lava flows have been classically divided into two categories: pahoehoe and aa (e.g., Dutton, 1884; Macdonald, 1953). Pahoehoe is characterized by having a smooth surface, and aa has a spinose auto breccia surface. In more recent years, some transitional types of basaltic lava have been noted, including slab pahoehoe and spiny pahoehoe (also called "toothpaste" or "sharkskin" pahoehoe). Spiny pahoehoe has the same centimetre scale morphology as classical pahoehoe but has a spinose surface (e.g., Rowland and Walker, 1987). Slab pahoehoe has the same meter-scale morphology as an aa flow, but the auto breccia is dominated by slabs of broken pahoehoe surfaces (e.g., Macdonald, 1972). There are also many sub varieties of classic pahoehoe in Hawaii, such as S- and P type pahoehoe (Walker, 1989), dense blue glassy pahoehoe (Hon et al., 1994), and shelly pahoehoe (Swanson, 1973). Most recently, another type of intermediate lava flow has been recognized. This flow type, dubbed "rubbly pahoehoe," is characterized by a flow top auto breccia comprised primarily of pahoehoe lobes (Keszthelyi, 2000; Keszthelyi and broken Thordarson, 2000). The area under investigation forms the part of the volcanic sequence of basaltic rocks belonging to the Deccan Volcanic activity, which is one of the largest known geological formations in India, covering over 80 percent area of the state of Maharashtra. As described earlier the local Basalt is converting in to Laterite in upper layers. The significant contributions to the field studies of the Deccan Volcanic Province during last few decades have recognized different flow types of basalts on the basis of associated volcanic features.

In general, the basaltic lava flows have been grouped in to two as follows;

- Compound (Pahoehoe) type
- Simple (Aa) type flows

The lava flows in the proposed site area are of compound types that occur in entire Pune area. The most characteristic feature of the compound flows is that they consist of flow units, which have smooth upper surface, often with ropy structures developed on them, and a basal zone exhibiting inverted 'Y' shaped pipe vesicles. The western and northern portion consists of a relatively denser rock. The upper portion of such flow units is vesicular / amygdaloidal (filled with white or green silica material) and the cavities are generally ovoidal. The compound flows consist of such several flow units. Ropy surfaces and ovoidal vesicles (often filled) together with pipe amygdales are characteristic features to recognize the individual units of a compound flow. A thin glassy (fine-grained) crust, which is usually reddened at the top, also delineates the different flow units. Congealed glassy lava toes with hummocky (undulating) tops are often noticed in fresh exposures in northern part. The maximum and minimum thickness observed for compound flows is 160 m and 40 m respectively. Thinner flow units are throughout vesicular. These features are especially very common in the region around Mumbai, Pune, Lonavala, Nasik, Aurangabad and Ahmednagar and have been documented. The simple (Aa) flows on the contrary are characterized by rough fragmental clinker tops and dense, hard and massive rock below. The clinker fragments are irregular, spiny and varying in size from a few cm reaching to the order of about a meter. The basalt Flows, in general are thick, tabular in form, having large areal extent. Thickness of flows generally ranges between 5 and 80 m.

Another aspect of the flows is that seldom they are separated by tuffaceous material referred to as bole. The boles are of red-, green and brown- types depending on their colour. These represent finegrained material and are not uniformly developed on flows. The flows are also separated by volcanic breccias. Volcanic breccias consist of angular to sub angular fragments of basalt in a tuffaceous material. Both these features have some adverse effect on the quarrying of rock depending upon their thickness

2.Hydro-Geology

2.1 Vegetation

The natural vegetation is average in the study area. There is a one tree currently on the premises. Developer will plant 276 no. of trees as per the requirement / convenience.

2.2 Soil

The area forms the heart of a vast suite of basalts with 1.25 to 1.50 m. of soil cover in N, NW, W, & SW parts of land and it is about 1.50 to 2.00 m. of soil cover in SW, SE and S and Southern parts of land. In general soil cover is very good in entire parts of land. The soil is mainly grayish in colour.

2.3 Hydrology / Well-hydrology

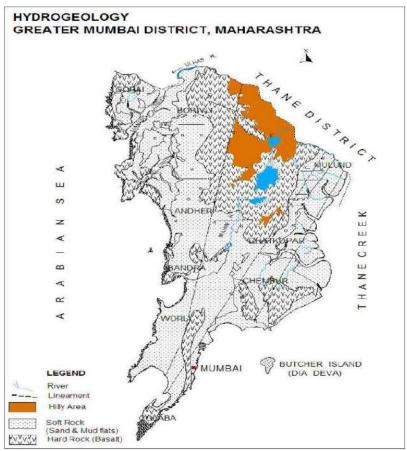

Figure 2. 1: Hydrogeological Map

In the study area bore wells / dug wells are not present. In the surrounded areas, bore wells are present. Depths of bore wells are limited between 30 to 60 m. and yield varies from 1" to 1 $\frac{1}{4}$ ". Water from the bore wells is mainly used for plantation, construction and domestic purpose.

3.Ground Water Survey

3.1 Information

The Groundwater survey was conducted using **Electrical resistivity method** in the given premises. In all 2 no. of soundings were taken. We have identified new spots with the help of Resistivity data and Hydro – Geological conditions to explore the ground water by drilling bore wells.

Deccan basalts of west-central India are hydro-geologically inhomogeneous rocks. A proper understanding of the physical framework of the basalts within which groundwater resides and moves is a key to the hydrogeology of these rocks. Two types of basalt, the vesicular amygdaloidal basalt and the compact basalt, occur as alternate layers in the volcanic pile. Although the rocks are generally inhomogeneous, structures in the basalt, such as sheet joints and vertical joints, serve as zones of groundwater flow.

In the shallow subsurface, two groundwater systems are operative. Groundwater system A consists of a vesicular amygdaloidal basalt underlain by a compact basalt, whereas groundwater system B consists of a vesicular amygdaloidal basalt overlain by a compact basalt. Groundwater system A has a better developed network of openings and, as a consequence, this system has a higher transmissivity and storage coefficient than Groundwater system B. Wells tapping groundwater system A have higher yields on average and irrigate more hectares of cropland than do wells tapping groundwater system B.

This simple systems concept offers a practical methodology for understanding the geometry of the physical framework that contains groundwater in the Deccan basalts. The efficacy of the concept is in its widespread utility for the region. The concept may also be extrapolated to help understand the hydrogeology of deeper Deccan basalt groundwater systems.

3.2 Methodology

3.2.1 Electrical Resistivity Method (IS: 1892-1979)

By applying this method, the resistance to the flow of an electric current through the subsurface materials is measured at intervals on the ground surface. The resistivity is usually defined as the resistance between opposite phases of a unit cube of the material. Each material has its own resistivity depending upon the water content, compaction and composition. The test is conducted by driving four metal spikes to serve as electrodes in to the ground along a straight line at equal distances. A direct voltage is imposed between the two outer potentiometer electrodes and the potential drop is measured between the inner electrodes.

To interpret the resistivity data for knowing the nature and distribution of the subsurface formations, it is necessary to make preliminary trial on known formations. The **Potential 'V'** thus obtained divided by the **Current 'I'** applied gives the **Resistance 'R'** of the ground. The product of the resistance and the spacing factor, which is depending upon the disposition of the electrodes, is the resistivity of the ground.

This method is routinely used for:

- Determining the sub-surface strata classification
- Determination of hard rock foundation
- Estimation of overburden thickness and hard rock quantities
- Determination of the suitability of the area for quarrying and excavation

A great variety of electrode arrangements have been used to measure the earth resistivity but essentially, they may be grouped into three classes.

- 1. Arrangements in which the potential differences between two widely spaced measuring electrodes are recorded.
- 2. Arrangements in which a potential gradient or electric field intensity is measured using closely spaced pair of measuring electrodes.
- 3. Arrangements in which the curvature of the potential function is measured using a closely spaced current electrode pair as well as a closely spaced measuring electrode pair.

Any one of these arrays may be used to study variations in resistivity with depth or in lateral condition. In studying the variation of resistivity with depth, as in the case of a layered medium the spacing between the various electrodes is gradually increased. With larger spacing, the effect of material at depth on the measurements becomes more pronounced.

In studying the lateral as well as vertical variations, various electrode configurations are adopted and the array is moved as a whole along a traverse line. The first type of measurement is called as **'Vertical Electrical Sounding' (VES)** and the second one is **'Horizontal Profiling' (HP).** In the present work **VES** were conducted at 2 different locations and the depth was limited to 60 m.

3.2.2 Wenner's Configuration

It is a Geophysical prospecting operation method in which measurement of Earth Resistivity is made from Ground Surface. The relative value of Electrical Resistivity can be interpreted, under certain condition, in terms of the general geology of the subsurface to limits depths.

The method has been used in ground water exploration since the early 1930s.

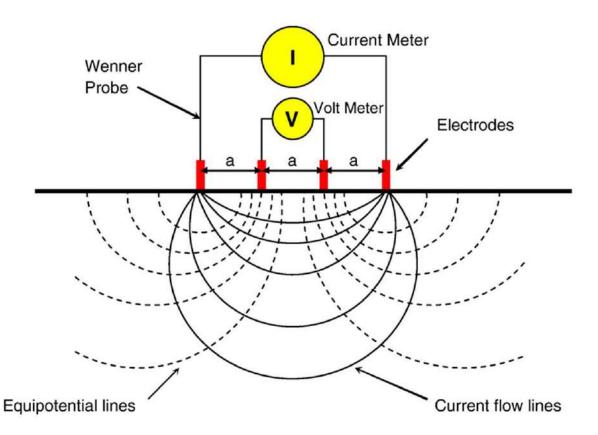

Figure 3. 1: Schematic representation of electrical resistivity measurement with Wenner's probe

Various types of earth materials generally exhibit certain ranges of the resistivity values. Using four electrodes set in the ground, the apparent earth resistivity is determined by measuring the voltage drop between two interior electrodes when current is passed thought the earth between outer electrodes. The most common arrangement is the Wenner's Configuration with the electrodes equally spaced along straight line.

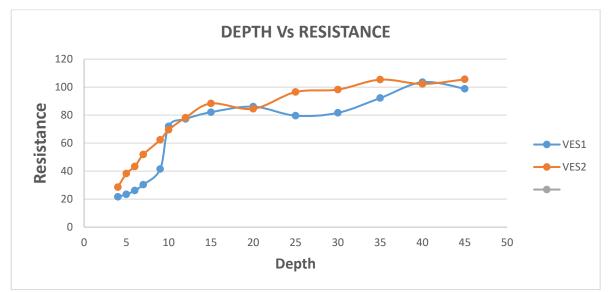

Electrical resistivity surveying finds its best application in preliminary exploration of large areas, where a substantial ground water development is desired.

In the present work VES were conducted at 2 different locations.

3.2.3 VES Data Output

Depth (m)	VES 1	VES 2
4	21.618	28.549
5	23.374	38.256

Figure 3. 3: Representation of Sub Surface Strata

3.2.4 Data Procession

In the area to understand the shallow subsurface geological and aquifer conditions extending up to 45-meter depth, vertical electrical soundings were conducted. The proposed area was investigated based on VES data as attached. Using **IPI2 WINDOW** based software the data obtained from field was processed. This software helps in interactive semi-automated interpretation of the field data. All the sounding data were modelled for the existing sections. The VES data on apparent resistivity values was modelled by using **IPI2 WINDOW** based software to get different layers depicting their thickness, depth and true resistivity.

In nutshell, the above interpretation gives generalized geological situation with depth-wise variations. As discussed above the sounding points with typical curves at selected sites give point information, which was further utilized to build comprehensive picture of subsurface geological situation depth-wise by preparing **2-D geo-electrical sections**

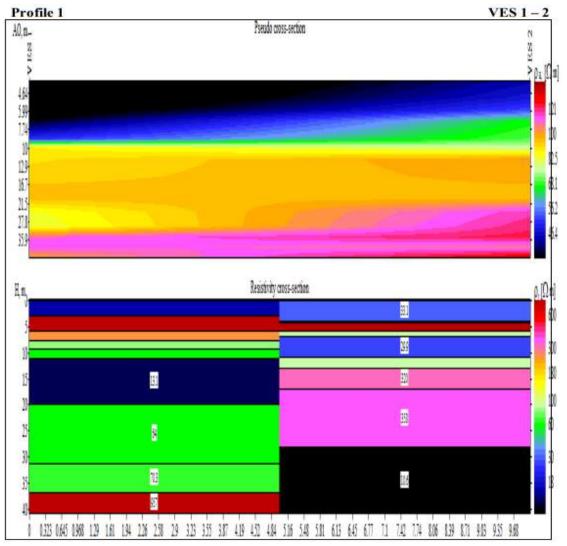

Figure 3. 4: Resistivity Cross-Section

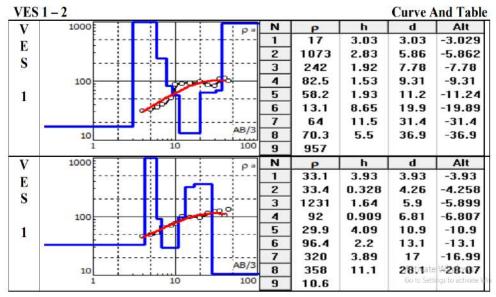

Figure 3. 5: VES Curve with Table

3.2.5 Geophysical Observations

Groundwater Investigations have been carried out by using geological and hydro-geological observations as already mentioned. Geophysical investigations have been carried out using electrical resistivity method at 2 no. of spots with Wenner's configuration. The recommendations are as follows:

Sr.	Soil + Weathere d Rock	Moderately Fractured Basalt	Poorly Weathered and Fractured Basalt	Poorly Fractured Hard Compact Basalt
VES 1 G.I m.	G.L. to 8 m.	8 to 10 m.	12 to 15 m & 25 to 35 m	10 to 12 m. 15 to 25 m.& 35 to
				45
VES 2	G.L. to 7 m.	7 to 9 m.	10 to 15 m & 30 to 40 m	15 to 30 m. & 40 to 45 m.

Table 3. 2: Lithology of the land as per resistivity survey

Aquifer Status:

- Average depth of Un-confined aquifer is at 3.00 m. to 4.00 m. (3.50 M. Average).
- Average depths of Confined aquifers are at 12.00 m. to 21.00 m. & 32.50 m. to 38.50 m.
- Aquifer layers shows an uneven thickness.

Ground Water Table:

- **Summer Season** 6.00 m. to 7.00 m. BGL.
- **Rainy Season** 3.00 m. to 4.00 BGL.
- Winter Season 4.50 m. to 5.50 m. BGL.

4.Recharging

Recharging may be carried out by both roof top rainwater harvesting as well as artificial surface recharging. Recharging would not only help in sustaining the well by recharging but also in improving the quality of the water by reducing alkalinity (salinity) and hardness

4.1 Rainwater Harvesting

Rainwater harvesting should be carried out in the property to enhance the availability of groundwater. In this case two rain water collection tank is suggested.

Rain water should be filtered with the help of RWH filter and allowed to collected into the collection tank for further domestic use.

Before monsoon all the terraces should be cleaned and fine cone shaped pipe screen mesh should be fixed on down take rain water pipes on terraces.

Considerations:

1.	Total plot area:	$6,150.57 \text{ m}^2$
2.	Net area under Consideration:	5,843.04 m ²
3.	Total roof top area:	1,830.00 m ²
4.	Total area under internal road, paved, services and rest area:	2,145.53 m ²
5.	Open space, plotting area, Landscape / Garden area:	1,867.51 m ²
6.	Considered Annual rain fall:	2,500.00 mm
7.	Considered days rainfall in one year:	80 days
8.	Considered factor for roof top area:	0.9
9.	Considered factor for road, paved area & services area:	0.7
10.	Considered factor for open Space and landscape & garden area:	0.25
11.	Total harvesting capacity:	200 m ³
12.	Total suggested harvesting is > 100 % o	f total surface
	run off after development, it is > 100 $\%$	of incremental
	rise in surface run off after development a	
	% of total available roof top rain	water after
	development.	

Run off for Roof top Area	RunoffforPaved,InternalRoads,ServicesArea,Rest	Run off for Open Space, Landscape & Garden Area	Total Run off for Entire Area			
4,117.50 m ³ /year	3,754.68 m ³ /year	1,167.19 m ³ /year	9,039.37 m ³ /year			
51.47 m ³ /day	46.93 m ³ /day					
Total surface run	9,039.37 m ³ /year					
Total surface run	off before developme	nt	5,843.04 m ³ /year			
Incremental rise in	n surface run off		3,196.33 m ³ /year			
Incremental rise in	n surface run off		39.95 m ³ /day			

Table 4. 1: Run off calculations

4.2 RWH Scheme Details (Proposed)

- a. Number of RWH Collection Tank 2 No.
- b. Volume of rainwater that can be harvested in 2 tanks = 200 cum/day
- c. Rainwater available from site = 112.99 cum/day.
- d. Rain water harvesting capacity = 200 cum/day.
- e. Suggested harvesting more than available roof top rain water
 = 148.53 m³ per day.
- f. Suggested harvesting more than incremental rise in surface run off = 160.05 m³ per day.
- g. Percentage Harvesting capacity = > 100 % of total available rain water, it is > 100 % of incremental rise in surface run off after development & > 100 % of available roof top rain water after development.

5.Conclusion

- 1. As the unconfined aquifer is at the depth of 3.00 m. to 4.00 m. (3.50 M. Average), we have recommended rain water harvesting tank for collection of rooftop rain water only.
- 2. Confined aquifers are at the depth of 12.00 m. to 21.00 m. & 32.50 m. to 38.50 m. of depth (Average).
- 3. As the increase in the runoff is 3,196 m³ per year i.e., 39.95 m³ per day, available roof top rain water after development is 9,039.37 m³ per year i.e., 112.99 m³ per day & as per requirement of form 1 B, we have recommended a water recharge with the help of 2 RWH collection tank.
- 4. Total harvesting provided is > 100 % of the total surface run off after development, it is > 100 % of incremental rise in surface run off after development and it is > 100 % of total available roof top rain water with respect to average rain falls conditions.
- 5. Provided harvesting of 200 m³/day is equal to 177% of total surface runoff after development, it is equal to 273% of total surface run off before development, it is equal to 43% of incremental rise in surface runoff & it is equal to 388 % of roof top rain water.
- 6. Provided harvesting of 200 m³/day will cover 100 % roof top rain water i.e., 112.99 m³/day and 177 % surface run off i.e., 9,039 m³/year. Roof Top available rain water is 51.47 m³/day & it will be collected in to RWH collection tank. Rest surface run off will be connected to external storm water/ natural nala

Internal Road & Paved Area	0.7			
Open Space, Landscape, Garden	0.25			
Roof Top Area	1830	sq. m	4117.50	51.47
Area Under Road, Paved, Rest etc	2145.53	sq. m	3754.68	46.93
Open Space, Landscape, Garden Area	1867.51	sq. m	1167.19	14.59
Total	5843.04		9039.37	112.99
Total Surface Runoff After Development		Cu. m	9039.37	112.99
Total Surface Runoff Before Development		Cu. m	5843.04	73.04
Increase in Surface Runoff After Development		Cu. m	3196.33	39.95

Rain Water Harvesting Details	RWH Tank		
No. of RWH Tanks/Pits with Bores	2.00		
Total RWH capacity of Tanks(Cum/Day)	200.00		
Individual capacity of RWH tank (Cum/Day)	100.00		
Total Capacity of RWH Tanks (Cum/Day & Cum/Year)	200.00 16000.00		

Percentage of harvesting compaired to total runoff rain water after development (w.r.t averagae rain fall)	177.00
Percentage of harvesting compaired to total runoff rain water before development (w.r.t averagae rain fall)	273.83
Percentage of harvesting compaired to incremental raise water (w.r.t average rain fall)	500.57
Percentage of harvesting compaired to total runoff rain water (w.r.t peak rain fall)	42.55
Percentage of harvesting compaired to roof top rain water (w.r.t average rain fall)	388.59
Percentage of harvesting compaired to roof top rain water (w.r.t peak rain fall)	93.41

1. Total plot area = 6,150.57 Sq. M.
2. Total deduction for roaf widening & amenity = 307.53 Sq. M.
3. Net area under considerations (1-2) = 5,843.04 Sq. M.
4. Total roof top area = 1,830.00 Sq. M.
5. Area under internal roads, paved & services area = 2,145.53 Sq. M.
6. Open space, area under plotting, landscaping & 1,867.51 Sq. M.
7.Total runoff after development 112.99 m ³ /day i.e 9,039.37 m ³ /year
8.Total runoff before 73.04 m ³ /day i.e 5,843.04 m ³ /year
9. Increase in surface run off = $3,196 \text{ m}^2/\text{year}$ i.e $39.95 \text{ m}^3/\text{day}$
10. Total harvesting suggested 200.00 m ³ /day with the help of 2 tanks
11. Total harvesting provided more than available roof top rain water <u>148.53</u> m ³ /day
12. Total harvesting provided more than incremental rise in surface runoff 160.05 m ³ /day
Two number of rain water harvesting tank having sufficient capacity to harvest roof top runoff water.
Total harvesting provided is greater than 100% of total surface runoff after
dvelopment, greter than 100% of incremental rise in surface runoff after development & it is greater than 100% of the total roof top rain water w.r.t ave. rain fall.
Provided harvesting of 200 m3/day is equal to 177% of total surface runoff after development, It is equal to 273% of total surface run off before development, it is equal to 43% of incremental rise in surface runoff & it is equal to 388 % of roof top rain water.
Provided harvesting of 200 m3/day will cover 100 % roof top rain water i.e. 112.99 m3/day.and 177 % surface run off i.e. 9039 m3/year. Roof Top available rain water is 51.47 m3/day & It will be collected in to RWH collection tank. Rest surface run off will be connected to external storm water/ natural nala.

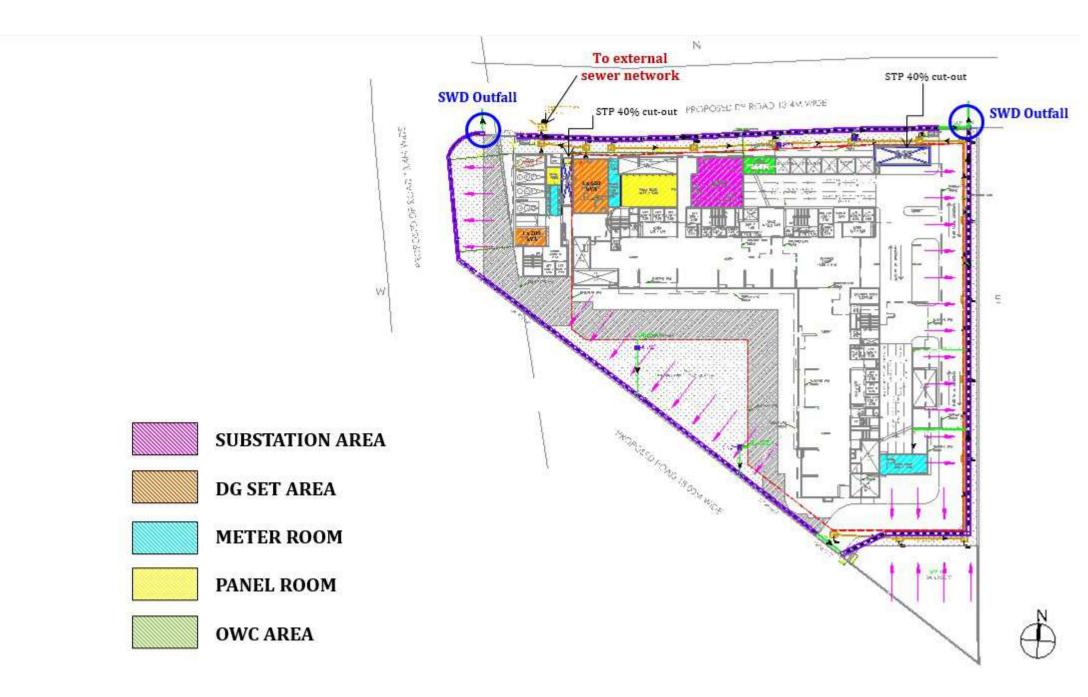

Total Plot Area (sq.m)	6150.57
Total Deductions (Sq.m)	307.53
Net Area (Sq.m)	5843.04

Rain Water Discharged from Roof Area							
Total Roof Area 1830							
Run-off Coefficient	0.90						
Quantity of rain water collected from roof	205.88						

Storm water runoff from paved surfaces						
Internal roads, paved, services area 2145.53						
Run-off Coefficient	0.7					
Quantity of storm water run-off from paved areas	187.73					

Storm water runoff from landscape area						
Total landscape area on mother earth 1867.51						
Run-off Coefficient	0.25					
Quantity of storm water run-off from green areas	58.36					

Total storm water discharge (m3/hr.)	451.97
Water collected in 10 min. of peak rainfall	75.33
volume of one recharge tank	100
No. of recharge tank required	1
No. of RWH tank proposed	2

5	NH4 N	5
6	N-total	10
7	Fecal Coliform	less than 100

- C] The treated domestic effluent shall be 60% recycled for secondary purposes such as toilet flushing, air conditioning, cooling tower make up, firefighting etc. and remaining shall be utilized on land for gardening and connected to the sewerage system provided by local body.
- 2) The Board reserves its rights to review plans, specifications or other data relating to plant setup for the treatment of waterworks for the purification thereof & the system for the disposal of sewage or trade effluent or in connection with the grant of any consent conditions. The Applicant shall obtain prior consent of the Board to take steps to establish the unit or establish any treatment and disposal system or and extension or addition thereto.
- 3) The industry shall ensure replacement of pollution control system or its parts after expiry of its expected life as defined by manufacturer so as to ensure the compliance of standards and safety of the operation thereof.
- 4) The Applicant shall comply with the provisions of the Water (Prevention & Control of Pollution) Act,1974 and as amended, and other provisions as contained in the said act.

Sr. No.	Purpose for water consumed	Water consumption quantity (CMD)
1.	Industrial Cooling, spraying in mine pits or boiler feed	0.00
2.	Domestic purpose	143.00
3.	Processing whereby water gets polluted & pollutants are easily biodegradable	0.00
4.	Processing whereby water gets polluted & pollutants are not easily biodegradable and are toxic	0.00

5) The Applicant shall provide Specific Water Pollution control system as per the conditions of EP Act, 1986 and rule made there under from time to time.

SCHEDULE-II

Terms & conditions for compliance of Air Pollution Control:

1) As per your application, you have proposed to provide the Air pollution control (APC)system and also proposed to erect following stack (s) and to observe the following fuel pattern-

Stack No.	Source	APC System provided/proposed	Stack Height(in mtr)	Type of Fuel	Content(in	Pollutant	Standard
S-1	D.G set of 650 kVA	Acoustic Enclosure	5.00	HSD 130 Kg/Hr	1	SO2	62.4 Kg/Day
S-2	D.G set of 200 kVA	Acoustic Enclosure	5.00	HSD 40 Kg/Hr	1	SO2	19.2 Kg/Day

2) The applicant shall operate and maintain above mentioned air pollution control system, so as to achieve the level of pollutants to the following standards.

Total Particular matter	Not to exceed	150 mg/Nm3
-------------------------	---------------	------------

- 3) The Applicant shall obtain necessary prior permission for providing additional control equipment with necessary specifications and operation thereof or alteration or replacemenalteration well before its life come to an end or erection of new pollution control equipment.
- 4) The Board reserves its rights to vary all or any of the condition in the consent, if due to any technological improvement or otherwise such variation (including the change of any control equipment, other in whole or in part is necessary).

5) Conditions for utilities like Kitchen, Eating Places, Canteens:-

- a) The kitchen shall be provided with exhaust system chimney with oil catcher connected to chimney through ducting.
- b) The toilet shall be provided with exhaust system connected to chimney through ducting.
- c) The air conditioner shall be vibration proof and the noise shall not exceed 68 dB(A).
- d) The exhaust hot air from A.C. shall be attached to Chimney at least 5 mtrs. higher than the nearest tallest building through ducting and shall discharge into open air in such a way that no nuisance is caused to neighbors.

SCHEDULE-IV

Conditions during construction phase

A	During construction phase, applicant shall provide temporary sewage and MSW treatment and disposal facility for the staff and worker quarters.
В	During construction phase, the ambient air and noise quality shall be maintained and should be closely monitored through MoEF approved laboratory.
С	Noise should be controlled to ensure that it does not exceed the prescribed standards. During night time the noise levels measured at the boundary of the building shall be restricted to the permissible levels to comply with the prevalent regulations.

General Conditions:

- 1 The applicant shall provide facility for collection of samples of sewage effluents, air emissions and hazardous waste to the Board staff at the terminal or designated points and shall pay to the Board for the services rendered in this behalf.
- 2 The firm shall strictly comply with the Water (P&CP) Act, 1974, Air (P&CP) Act,1981 and Environmental Protection Act 1986 and Solid Waste Management Rule 2016, Noise (Pollution and Control) Rules, 2000 and E-Waste (Management & Handling Rule 2011.
- 3 Drainage system shall be provided for collection of sewage effluents. Terminal manholes shall be provided at the end of the collection system with arrangement for measuring the flow. No sewage shall be admitted in the pipes/sewers downstream of the terminal manholes. No sewage shall find its way other than in designed and provided collection system.
- 4 Vehicles hired for bringing construction material to the site should be in good condition and should conform to applicable air and noise emission standards and should be operated only during non-peak hours.
- 5 Conditions for D.G. Set
 - a) Noise from the D.G. Set should be controlled by providing an acoustic enclosure or by treating the room acoustically.
 - b) Industry should provide acoustic enclosure for control of noise. The acoustic enclosure/ acoustic treatment of the room should be designed for minimum 25 dB (A) insertion loss or for meeting the ambient noise standards, whichever is on higher side. A suitable exhaust muffler with insertion loss of 25 dB (A) shall also be provided. The measurement of insertion loss will be done at different points at 0.5 meters from acoustic enclosure/room and then average.
 - c) Industry should make efforts to bring down noise level due to DG set, outside industrial premises, within ambient noise requirements by proper sitting and control measures.
 - d) Installation of DG Set must be strictly in compliance with recommendations of DG Set manufacturer.

- e) A proper routine and preventive maintenance procedure for DG set should be set and followed in consultation with the DG manufacturer which would help to prevent noise levels of DG set from deteriorating with use.
- f) D.G. Set shall be operated only in case of power failure.
- g) The applicant should not cause any nuisance in the surrounding area due to operation of D.G. Set.
- h) The applicant shall comply with the notification of MoEFCC, India on Environment (Protection) second Amendment Rules vide GSR 371(E) dated 17.05.2002 and its amendments regarding noise limit for generator sets run with diesel.
- 6 Solid Waste The applicant shall provide onsite municipal solid waste processing system & shall comply with Solid Waste Management Rule 2016 & E-Waste (M & H) Rule 2011.
- 7 Affidavit undertaking in respect of no change in the status of consent conditions and compliance of the consent conditions the draft can be downloaded from the official web site of the MPCB.
- 8 Applicant shall submit official e-mail address and any change will be duly informed to the MPCB.
- 9 The treated sewage shall be disinfected using suitable disinfection method.
- 10 The firm shall submit to this office, the 30th day of September every year, the environment statement report for the financial year ending 31st march in the prescribed Form-V as per the provision of rule 14 of the Environmental (Protection) Second Amended rule 1992.
- 11 The applicant shall obtain Consent to Operate from Maharashtra Pollution Control Board before commissioning of the project.

This certificate is digitally & electronically signed.
